

OUR GLOBAL ENGINEERING FOOTPRINT

21 Global Reach
Countries

400 + Projects
Completed

1.5 Millions +
Engineering
Man-Hours

INDUSTRIES WE SERVE

Energy

Power Plants 75+
Green Hydrogen 5+

Bio-Energy

Ethanol & Distillery 40+
Bio-Mass Power Plants 5+
Waste to energy 5+
Bio-Methanol 2+

Process

Process Plants 15+
Chemical Plants 10+
Paper & Pulp 10+

Oil & Gas

Oil & Gas 10+
Refinery 5+
Gas Processing 5+

Industrial & General Engineering

Skids & Packages 20+
Equipment Engineering 25+

Utilities

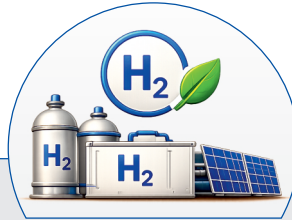

Water & Waste 100+
Water Treatment 100+
Cooling Towers,
DM Plants,
ETP/STP 50+

BIOMASS & WASTE-TO-ENERGY [RENEWABLE]

Sustainable generation from organic & renewable feedstock for lower carbon emissions.

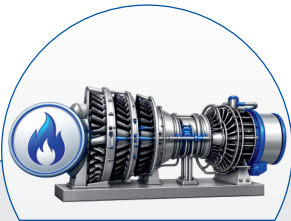

HYDROGEN ENERGY [CLEAN ENERGY]

Engineering solutions for hydrogen production, handling & integration to support clean energy transition & decarbonisation.

COMBINED CYCLE + HRSG [HIGH-EFFICIENCY]

Maximised thermal efficiency through heat-recovery steam generators & waste-heat recovery.

GAS & MULTI - FUEL TURBINE [FLEXIBLE]

Cleaner, grid-balancing generation on natural gas & multiple fuel sources.

BOP & UTILITY SYSTEMS

Engineering & Design of Balance of Plant, Utility Piping, Water Treatment, Cooling Water, Fire Protection, Compressed Air and Auxiliary Systems.

THERMAL REVAMP & EFFICIENCY

Performance assessment, emission-control retrofits & operating-problem solutions for existing plants.

• CODES & STANDARDS APPLIED •

ASME | ASME Sec VIII Div 1 & 2, ASME BPVC Sect III NC/ND | API | TEMA | EN | IS PD-5500 | OTHER APPLICABLE RELEVANT INTERNATIONAL STANDARDS

3 Stage Quality Assurance

Independent Checks at Defined Engineering & Design Gate

Flexible Engagement Models

Project - Based
Dedicated Team | Extended Engineering Team

Extended Engineering Team

Dedicated Engineering Resources
Integrated With Client Project Team

ISO Certified

9001:2015 Quality
27001:2022 Information Security
